mobile fax and phone in one solution possio PM70&PCC

triple band meets paper

✦ The lightweight and flexible Possio PM70 Mobile Fax and Phone just got better. The new Possio Connectivity Card – PCC in short – is a full featured triple band cellular card phone that brings the world to the world's most popular mobile fax.

✦ The PCC, developed by Possio for the PM70, is a tightly integrated communication device that includes all the connectivity hardware necessary for the PM70. You can now travel around the world and send and receive fax messages, make calls, receive and print SMS – wherever you go and whenever you need it.

get the information on paper

✦ Does a mobile phone and E-mail really solve all your communication needs? Whenever you work on the road or at temporary locations there will always be need for a fax machine and an efficient method for handling information on plain paper. Maps, technical drawings, contracts, order acceptances and other files need to be received and sent. A mobile fax makes your life easier and reduces your costs by making you available for all those documents. For all those tasks when the fax is not enough the phone is included and your E-mails can be received as SMS and printed on paper.

✦ The PM70 is a durable device, proven its usability in many environments ranging from the deserts of Saudi-Arabia to the icy plains of Antarctica. The thermal printing device is insensitive to cold, heat, and humidity, making it ideal for use in vehicles.

go anywhere – fax everywhere

✦ The road warriors can now benefit by deploying the PM70 as an easy to install, easy to operate, and low cost fleet management solution. Regardless of whether you are a truck driver, a sales person or a technician on the road you will benefit from being able to send and receive fax on paper.

✦ Fax the delivery proof to the office and let headquarter send out the invoice on the same day as the shipment is made. While negotiating business deals on the field you can fax proposals and figures back and forth to your office. It will save your day by keeping you on track with the paper work wherever you go. It will save your money by transferring information in real time whenever you need it. It is simple and it works. Everywhere.
